I'm not so sure about this...
Who cares. High risk, high reward right?

I have been searching for games similar to this, games that have beautiful and distinctive art design, great choice of actions, and well-made plot. Playing Oakwood Academy of Spells and Sorcery had me addicted and hooked to each route. It warmed my heart achieving good endings and gave me gut-wrenching regret to all the bad choices, luckily with the power of saving and loading game you can erase those mistakes and makeup. The only thing missing that I really wish the developers can take into account and implement is to add in a gallery so that I know I have unlocked all scenes. All in all, it was an addicting game which I had fun playing for hours on end.
If the devs read this. Hi.
